

OBJECTIVE

Backend-focused Software Developer seeking an internship to design, build, and optimize high-performance APIs using Python and FastAPI, implement efficient server-side logic, and contribute to scalable, low-latency systems deployed in cloud environments.

EDUCATION

- ANITS College** Visakhapatnam, India
B.Tech in Electrical and Electronics Engineering; CGPA: 8.12 Aug 2022 – Present
- Chaithanya Junior College** Nandigama, India
MPC; Percentage: 79.3% 2020 – 2022

EXPERIENCE

- Infinexol Solutions Pvt. Ltd.** Hyderabad, India
Software Developer Intern Feb 2026 – Present
 - Backend Development:** Developing scalable RESTful APIs using Node.js, Express.js, and TypeScript for production-grade applications.
 - API Architecture:** Designed modular route structures, middleware layers, and service-based architecture for maintainable backend systems.
 - Database Design:** Worked with PostgreSQL to design relational schemas, write optimized queries, and manage transactional data.
 - Authentication & Security:** Implemented secure authentication and authorization mechanisms using JWT and role-based access control.
 - Performance Optimization:** Improved API response times through query optimization, indexing strategies, and efficient asynchronous handling.
 - Code Quality:** Maintained strict TypeScript typing standards and followed clean code practices for scalable development.
- Ceeras IT Services Pvt. Ltd.** Remote
Software Development Intern Feb 2025 – May 2025
 - API Development:** Designed and implemented RESTful APIs using Python frameworks for handling business logic and client-server communication.
 - Server-Side Logic:** Implemented efficient backend workflows, including asynchronous request handling using Python async/await.
 - Authentication:** Built secure JWT-based authentication systems for role-based access control.
 - Database Management:** Designed PostgreSQL schemas and optimized queries for storing and retrieving application data.
 - Caching & State Handling:** Used Redis for caching and managing temporary application states to reduce response latency.
 - Performance Optimization:** Improved API response times by optimizing query patterns and backend logic.
 - Debugging:** Troubleshooted backend issues and resolved performance bottlenecks.
 - Documentation:** Documented API endpoints, workflows, and system behavior for maintainability.

PROJECTS

- Real-Time Video Communication Platform:** Built backend services using Python for handling session management and token generation. Implemented asynchronous request handling and optimized endpoints for low-latency communication. Deployed core services to a cloud environment.
- Zokart – Scalable Vendor Discovery Platform:** Developed scalable REST APIs using Python. Designed PostgreSQL schemas and used Redis caching to optimize frequent queries. Focused on high-performance endpoints and backend reliability.
- Road Safety Alert System (Hackathon):** Developed a real-time backend system using Python and WebSockets. Implemented concurrent request handling for continuous location updates and optimized database writes. Finalist – Top 7 of 200+ teams.

TECHNICAL SKILLS

- **Languages:** C, Python, JavaScript, TypeScript SQL
- Backend Frameworks:** FastAPI, Django, Node.js, Express
- API Development:** RESTful APIs, Async Processing, Low-Latency Systems
- Databases:** PostgreSQL, Redis
- System Concepts:** Asynchronous Programming, Scalability, Distributed Systems Basics
- Cloud:** Cloud Deployment (Basics)
- Version Control:** Git, GitHub
- Testing & Debugging:** API Testing, Performance Debugging
- Core Strengths:** Problem-solving, learning mindset, analytical thinking
